

Noise protection SM

Characteristics

Thanks to the noise protection, specially developed for the Grimm bowl feeder of type SM, the noise level can be decisively reduced during the sorting process. Around 20 to 50 mm of sound-proofing material ensures optimal noise absorption. Noise protection SM is available in six different sizes and is easily accessible thanks to the flip-up lid.

ring the sorting process. Around 20 to 50 mm of sound-proofing material ensures optimal noise absorption. Noise protection SM is available

in six different sizes and is easily accessible thanks to the flip-up lid.
